

Transformaciones Agrícolas de Badajoz S.A, we are a company dedicated to "**Design and production of tomato paste and tomato powder**" services. We are aware that our provided services are essential for society, and by this reason, we are adopting this policy, with the aim of improving the energy performance of our organization, considered it appropriate to our purpose and context, and supporting the strategic direction.

From the General Direction, we declare the implementation, maintenance and improvement of the Energy Management System, based on the **UNE-EN ISO 50001:2018 Standard**, as a strategic and priority objective, mainly based in the following guidelines:

- **To integrate** energy considerations into our business strategy, taking into account the energy criteria in our planning and decision-making.
- **To comply** with the legislation and other applicable requirements, related to energy management and the use and consumption of energy.
- **To establish** energetic objectives and goals, with the commitment to guarantee the availability of information and the necessary resources to achieve them.
- **To apply, develop and improve** the processes, with the aim to achieve the maximum energy efficiency, under our commitment for a Continuous Improvement of energy performance.
- **To support** the design of facilities, equipment, systems and processes that consider the improvement of energy efficiency and the use and consumption of energy.
- **To support** the acquisition of more energy efficient products and services.
- **To Informe and train** our workers on energy aspects linked to our activity that influence or affect the significant uses of energy and its functions. Motivation and Sensibilization for they to be applied in their workplaces.
- **To review** periodically this Policy **and modification or adaptation**, if necessary, to ensure that it continues to be relevant and appropriate for our organization.

These principles are assumed by the **General Director**, who has the necessary means and provides to the employees with sufficient resources for its compliance, embodying them and making them public through this Energy Efficiency Policy.

General Director
