

QUALITY, FOOD SAFETY AND ENVIRONMENTAL POLICY

TRANSA dedicates its industrial activity to the **PROCESSING OF FRESH TOMATO INTO TOMATO PASTE AND TOMATO POWDER.**

Its *Quality, Food Safety and Environmental Policy* is based on **satisfying customer needs, fulfilling their requirements and attempting to exceed their expectations.** All this while bearing sustainable development in mind and seeking to minimize the environmental impact originated from such activity.

The Management of TRANSA understands that it is essential to count on competent, trained and dedicated personnel in order to achieve its objectives, committed to the company and therefore to its customers.

Our main goals are:

- Guaranteeing the manufacture of safety, legal and authentic products, according to the specific quality.
- To define and maintain an effective and clear plan for the development and continual improvement of **a food safety and quality culture.**
- Getting committed to **reduce gas emissions**, to improve water and energetic efficiency and to assure the fulfilling of the company **sustainability** protocol, bearing climate change in mind.
- Revising and **continuously improving** the Food Safety, Quality, Environmental Management System through the improvement, prevention and reduction of the impact that could be caused by our activities, and where appropriate, taking into account developments in science, technology and best practices.
- Compiling legal regulations in effect applicable to all activities of the company as well as statutory requirements or further ones, which the organization voluntarily accepts.
- Setting objectives and targets consistent with the business purpose and yearly revised and transferring them to all levels of the organization, providing the necessary resources to reach them.
- Preventing and controlling pollution through processes, practices, materials or products that avoid, reduce or monitor it before planning any new activity or expanding any other one that is already being performed.
- Assuming responsibility before its customers.

TRANSA Quality, Food Safety and Environmental Management System is based on the requirements of Standards ISO 9001:2015 and ISO 14001:2015, that are founded on risk-based thinking, and safety food standard BRC (Issue 9). Additionally, our aim is extended to work under the protocols that allow us to maintain Halal and Kosher certificates.

This *Quality, Food Safety and Environmental Policy* must be understood and applied by all our company staff therefore it shall be reported in a comprehensive and effective manner.
